Editor's Page

My thanks to our Peer Reviewers

In this age of “fake news” and “predatory journals”, the peer review process could never be more important. A knowledgeable reviewer plays a vital role in maintaining the integrity of the scientific process. In fact, without adequate peer review, academic excellence would falter.

So my hat is off to the 84 people who provided their time and expertise in formulating their reviews for the journal of Clinical and Investigative Medicine (CIM).

*Those reviewers with an asterisk beside their name deserve special recognition for performing two or more reviews this past year.

My thanks to all.

Robert Bortolussi

Editor-in-Chief, *Clinical and Investigative Medicine*
